

Yarde Metals Waterjet Cutting

Power. Precision. Versatility.

Want to take concepts to nested parts quicker and more cost effectively? Cut out the middle man with Yarde Metals waterjet cutting. Our extensive inventory of over 40 million pounds of metal, two waterjet processors and a dynamic waterjet head delivers the power, precision and versatility necessary to take on virtually any assignment. Yarde proudly plays a key role in the manufacturing of some of the most critical components in the world.

Production Power

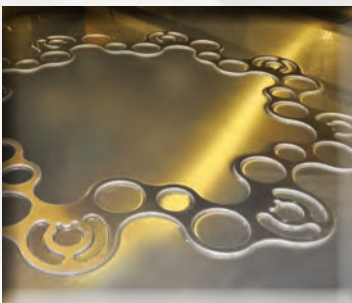

- Two state-of-the-art waterjet cutting machines
- A combination of 40 million lbs on the floor and 90,000 psi provide faster processing.
- Around-the-clock cutting from our team of experts and local delivery ensure you receive quick turnaround of your precision-cut waterjet parts – on time.

Precision

- Tolerances from .005
- Narrow kerf (.060) produces net-shape parts with no heat affected zone, heat distortion or mechanical stresses.
- Dynamic heads for reduced bevel

Versatility

- Processing aluminum, stainless, carbon steel, brass and copper
- Capable of cutting 1/16" thick up to 6 1/2" thick
- We'll do the work for you. Yarde Metals offers in-house cad cam and nesting.
